

REGISTRATION ON SUNDAY

The registration started at 10 00 am and ended at noon on Sunday at the Conference Centre. Each participant was given a conference kit consisting of the programme, compilation of abstracts, CD of conference papers, MTPA brochure. A lot of exchange could be observed among the delegates from the different countries - setting the mood of the conference. Thirty four overseas and eight local delegates have registered. About 100 participants are expected in this 11th GASAT meeting.

Themes of GASAT 11

Keeping in view the objectives of GASAT, a number of themes are identified every time this conference is organised.

The themes selected for this 11th Conference are

- 1 New initiatives in Science, Technology, and Mathematics at the Formal level.
- 2 Meeting the challenges of the New Technologies
- 3 Women, Science, Technology and the workforce
- 4 Gender, The Environment and Sustainable Development.

Participants are grouped according to their thematic interests.

At the conference they get the opportunity to present their papers on the different themes in the light of their research findings. These are discussed and debated in the sessions held at the Conference. The outcome of the debates form the basis for resolutions and recommendations to be presented to governments of participating countries for implementation.

Participants' Views about the GASAT 11 Conference

GASAT 11 organisers have made an excellent use of e-communication facilities.

Use of printed circulars would access a greater number of committed practitioners.

GASAT as an organization is at a critical stage of development and needs leaders to reactivate its activities.

(Jan Harding, UK)

The conference in Mauritius provides access over a week to intensive debates. It will contribute to the understanding of the present state, frontiers of knowledge and new evolving paradigms about gender studies. As participants we look forward to building and sustaining international partnerships and continuing professional exchanges.
