

The striking feature of GASAT 11 has been the ways of developing the themes for the conference. These are community-based and they open possibilities for change and creativity for women in Science.

With relation to situating science within the community and the world of women, GASAT 11 is expected to find ways of relating “hyper-intellectual knowledge “ to the real world of women.

(Shauna Paull, IWIS Project Coordinator – Immigrating Women in Science, Vancouver, Canada)

All participants say a big thank you to all organizers of the GASAT 11 conference.

YOUR SMILE FROM THE SECRETARIAT

Brief from Mona Dahms Chair GASAT 10

First of all, I am happy to be in Mauritius. I have been here before many years ago. I have been eagerly waiting to be back on this beautiful island, Mauritius. I am happy that Mauritius, MIE and MRC have taken the responsibility of hosting the conference.

I am grateful to Mrs Jaya Naugah and to Dr Yashwant Ramma for their driving forces behind the planning of the conference. I am also grateful to the Patron, Lady Sarojni JUGNAUTH for her assistance and help in all the troubles and hardships which have been very invaluable to this conference. I'll have a wonderful time and experience in Mauritius on a social and professional note and wish the same for the participants.

On behalf of all the participants and myself, I extend a warm thank you to all the people who contributed in the organisation of the conference.

GASAT BOARD IN SESSION

GASAT Board meeting was held on Sunday 6 July 2003 at the Grand Baie International Conference Centre at 14:00 to approve minutes of GASAT 10 held in Copenhagen and to discuss issues pertinent to GASAT 11 and GASAT in general.
